***Status of Claims***

1. Claims 1-20 have been examined.

***Response to Arguments/Amendments***

2. The first limitation of claim 2 recites (lines 5-8),

... and wherein the step of establishing a communication comprises checking, in said service device, as to whether a load instruction has been entered into said service device and, if so, establishing said communication with said data center

Therefore, according to claim 2, establishing communication with the data center is based on a load instruction. This is in contradiction with claim 1, which establishes a communication between the data center and service device first (claim 1, second limitation) and then loads service data (claim 1, last limitation).

***Claim Objections***

3. Claims 2 and 12 objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

Claim 2 recites a loading step then establishing a communication link with the data center based on said loading. Claim 1, on the other hand, from which claim 1 depends, communicates with the data center first and based on said communication loads into a service device. Claim 12, dependent on claim 11, recites similar language.

***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 2-9 and 13-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 recites a loading step then establishing a communication link with the data center based on said loading. Claim 1, on the other hand, from which claim 1 depends, communicates with the data center first and based on said communication loads into a service device. Therefore, it is unclear how the "loading" and "communicating" steps of claim 2 are implemented.

Claims 2, 3, 7, 12, 13 and 17 recite the limitation "memory areas" (e.g. first memory areas). There is insufficient antecedent basis for this limitation in the claim.

Claims 3-9 and 13-19 are also rejected as they depend from claims 2 and 12, respectively.

### ***Conclusion***

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
